 ORDER EARLY - LIMITED SUPPLY - CHECKS WILL BE RETURNED IF YOUR ORDER CANNOT BE FILLED. NO REFUND/WARRANTY ON ALL PRODUCTS.  
 KENOSHA COUNTY TREE PROGRAM IS OPEN TO EVERYONE - YOU DO NOT NEED TO BE A KENOSHA RESIDENT TO PARTICIPATE.

COMMON NAME	DESCRIPTION AND CHARACTERISTICS
<b>AMERICAN PLUM</b> GROWTH RATE – MEDIUM	Medium to tall tree/shrub for farmstead windbreaks, highway and riparian plantings. Adapted to a wide variety of soil types. Fair to good drought tolerance. Full sun to partial shade. Bears white flowers in spring, and yellow to red edible fruit in June-July. The fruit is used widely for making jams and jellies. The American plum is also highly important as wildlife cover and food.
<b>BLACK CHERRY</b> GROWTH RATE – FAST	The Black Cherry may grow to 60-80 feet tall by 30 feet wide (or larger) when it is found in an open field and live as long as 150 years. The fruit is a reddish-black cherry, which is edible although quite acidic. This species is found on a wide variety of soils. The black cherry is one of the largest cherries and, as such, its wood can be very valuable..
<b>BLACK WALNUT</b> GROWTH RATE - MEDIUM	One of the scarcest and most coveted native hardwoods, Black Walnut is used especially for furniture, gunstocks, and veneer. Individual trees fetch attractive prices. Fragrant leaves. Likes deep, rich, well-drained soil; grows more slowly in drier soils. Grows to 50' to 75', 60' spread. (May self-pollinate, plant two trees to ensure pollination) The delicious nuts must be gathered early, before squirrels and other wildlife can consume them.
<b>COLORADO BLUE SPRUCE</b> GROWTH RATE – MEDIUM	One of the most popular ornamental conifers, the Colorado blue spruce (or simply, blue spruce) is a truly magnificent sight. Grows best in full sun, in moist, well-drained, fertile soils. The Colorado blue spruce grows to a height of 50–75' and a spread of 10–20' at maturity. Needles are stiff, short, and silvery blue to greenish blue in color. The species has an excellent natural shape and requires little shearing.
<b>COMMON LILAC</b> GROWTH RATE – MEDIUM	The Common Lilac is noted for its showy, fragrant bloom in the late spring. Flowers come in many colors ranging from white, pink, blue, lavender to reddish-purple, clusters of flowers sit against dark green, heart shaped leaves, and the fragrance is just delightful. Grows best in well drained, fertile soils, under full sunlight. Average height is 15'.
<b>EASTERN ARBORVITAE</b> GROWTH RATE – MEDIUM	a.k.a. American arborvitae - Bright emerald green year-round foliage. Its dense foliage makes an excellent hedge or privacy screen. They will grow to a mature height of 30 to 40 feet and a mature spread of 10 to 15 feet. They prefer full sun to partial shade, and can grow in a variety of soil conditions. The Eastern Arborvitae is tolerant of heat, cold, and wet sites.
<b>EASTERN RED BUD</b> GROWTH RATE- FAST	Spectacular rosy pink blossoms that appear in April, usually one of the first trees to welcome the spring. Great colorful foliage year round with reddish-brown leaves changing to dark green then to yellow in fall. Forms a spreading, graceful crown. Even in winter, covered with snow, the eastern redbud is stunning. Full sun or light shade. Grows to 20' in height with a 20' mature spread.
<b>FRASER FIR</b> GROWTH RATE - MEDIUM	Often referred to as the Cadillac of Christmas trees. This tree has an excellent fragrance with exceptional needle retention. Strong branches are turned slightly upward which give the tree a compact appearance and shows the silvery color. Full to partial sun. Likes cool, moist, well-drained soils. Height 30-40 ft Width 20-25 ft.
<b>HAZEL NUT</b> GROWTH RATE- FAST	A large fast growing shrub with showy spring flowers. The Hazel Nut can grow to 8-12' tall with a crown spread of 10', creating a dense privacy screen, perfect for a hedgerow and as nesting sites for birds. The nuts of this American Hazel Nut have a higher nutritional value than acorns and beechnuts, making them a valuable food source for wildlife eaten by turkey, ruffed grouse, and pheasants.
<b>HYBRID POPLAR</b> GROWTH RATE – EXTREMELY FAST	Grown from rooted cuttings this extremely fast grower is widely used in the fuel, pulp and fiber industry also makes an excellent windbreak. Hybrid Poplars can provide privacy and windscreens in 3 years, living borders and shade in 4 years and firewood in 5 years. Hybrid poplar trees grow up to 10 feet per year and they live 40+ years.
<b>NORTHERN CATALPA</b> GROWTH RATE – FAST	A medium sized shade tree with enormous leaves, very showy white and purple orchid-like flowers in early summer, long narrow bean pod-shaped fruit in fall are very ornamental. Northern Catalpa will grow to be about 55 feet tall at maturity, with a spread of 30 feet. It has a high canopy with a typical clearance of 7 feet from the ground. This tree does best in full sun to partial shade. It is an amazingly adaptable plant, tolerating both dry conditions and even some standing water.
<b>NORTHERN RED OAK</b> GROWTH RATE – FAST	It is fast growing, easy to transplant, tolerant to a variety of soil conditions. Height: 50 to 75 feet. Spread: 50 to 75 feet. The abundant acorns attract wildlife, and the leaves develop a brick-red fall color. A variety of birds depend upon Red Oak acorns, the wild turkey in particular. A Northern Red Oak may live up to 500 years.
<b>NORWAY SPRUCE</b> GROWTH RATE – FAST	The Norway Spruce is the most widespread, fastest growing, largest and most disease resistant spruce in the northern hemisphere. This is not a tree for a small yard! The Norway Spruce can grow 2-3+ feet per year their first 25 years under good conditions. The Norway spruce has a fibrous deep spreading root system, able to withstand winds up to 100MPH.
<b>RED MAPLE</b> GROWTH RATE – FAST	Brilliant fall coloring is one of the outstanding features of the Red Maple. This tree prefers full sun to partial shade and tolerates both extremely wet to extremely dry soils. The Red maple is prized as an ornamental shade tree because of its rapid growth, reaching heights of 40-70' tall. Leaves have a silvery underside and turn a pale yellow in the fall.
<b>ROSELLOW SARGENT CRABAPPLE</b> GROWTH RATE – MEDIUM	"Roselow" Sargent's Crabapple is a small dense-branching crabapple that is covered with pure white fragrant blossoms in mid-May. One of the smallest crabapples, it reaches a height of only 8 feet. Full sun is ideal. Resistant to drought, soil compaction and flooding. This tree does well on a variety of soils and is an excellent planting for wildlife or windbreak.
<b>SUGAR MAPLE</b> GROWTH RATE – MEDIUM	The Sugar Maple is a landscape standout. Medium to dark-green leaves turn yellow, burnt orange or red in fall. Tolerates shade, likes a well-drained, moderately moist, fertile soil. Do not plant in confined areas or where salt is a problem. Grows to 60' to 75' with a 40'-50' spread. The sugar maple tree is the principal source of maple sugar.
<b>WHITE FLOWERING DOGWOOD</b> GROWTH RATE – MEDIUM	The White Flowering Dogwood has an excellent show of white blossoms in spring, and bright red berries in fall and winter. It is a low branching tree that spreads horizontally and has a semi-rounded top. Does best in sun to part shade. This deciduous tree does best in well-drained acid soil. It has a mature height of 30' and a mature spread of 20'.
<b>WHITE PINE</b> GROWTH RATE – FAST	The White Pine is a large, straight-stemmed tree with a pyramidal crown. Clustered soft blue-green needles. Ideal screen or windbreak. Likes moist, well-drained soils. Grows 50' to 80' with a 20-40' spread. Mature trees can easily be 200 to 250 years old.
<b>WHITESPIRE BIRCH</b> GROWTH RATE – FAST	Whitespire Birch has a nice narrow, pyramidal size and has chalky white bark that looks great all season long and because of its shape it's great along property lines. The bright green leaves rustle in the wind and turn the brightest yellow in the fall. It is heat tolerance and disease resistance. Grows well in full sun, reaching 50-60 feet when mature. It does well under a wide range of soil types.
<b>WHITEBERRY</b> GROWTH RATE – MEDIUM	Brighten up your winter landscape with bright red fruit that ripens in August and will hang on until late January. Adaptable to wet conditions and is a native in swampy areas making it an excellent shrub for moist soils in low spots or along streams and ponds. No serious insect or disease problems. Height and width 6-10' Winterberry will attract songbirds and other animals to your property, the fruit serving as an emergency food source for wild birds.
<b>WATER GEL</b> ONE BAG WILL TREAT ABOUT 100 TREES	Water Gel is a powder, which is mixed with water to form a gel that the roots of the seedling are dipped into. The gel acts as a water-holding medium and helps to maintain an even moisture balance around the seedling roots after planting. The gel will remain active for at least one growing season.
