

GL-13-23

7/14/23

Notice of Claim by Richard Seinhof
On 6/12/23 while in custody at KCC, F. South ("Living Free"), I felt a pop and ~~burst~~ burst in the back of my head. The guard on duty was Clo Sanderson, another inmate told him that I was in need of medical attention. I was brought to the medical ward to be seen by Naphcare. While at medical, I told the nurse on duty (an African American woman), that I felt a pop and burst in the back of my head. I also told her of the severe head pain that felt as if my head was going to explode, terrible pressure pain. She took my blood pressure, did an EKG, and took my blood sugar level. I was then given a blood pressure pill, Ibuprofen, told I have an appointment with the provider in 5-7 days, and told that I'm fine and nothing was wrong with me. I was then sent back to the dorm. On 6/13/23 I slept all day, never checked on by anyone, only asked if I was going to eat. On 6/14/23, I slept all day. I did try to eat only to vomit the tiny bit of food I ate. I was never checked on. I messaged medical 2 times on 6/14/23 and was ignored, no response. I also asked the Clo Griffin to see medical and was told "there's nothing I can do". On 6/15/23, I was by chance able to ask Mrs. Norris to see medical, she said she would do what she could. I saw medical in the afternoon. It was the same nurse I saw on 6/12/23.

(over)

She said to me "What are you doing here? I told you, you were fine. You have an appointment." She would NOT listen to my concerns that I was getting worse and worse since 6/12/23, I was completely ignored and belittled and sent away. I fell out that evening of 6/15/23 and was finally rushed to the hospital. I spent the next 12 days in ICU and a total of 16 days in the hospital. I had bleeding on the brain, a ruptured blood vessel in my brain, and suffered a stroke. I was denied medical care for 4 days ~~after~~ ~~staying~~ after having a blood vessel rupture in my brain and start to stroke on 6/12/23.
