1-5 Yrs: 24
6-10 Yrs: 5
11-15 Yrs: 5
16-20 Yrs: 3
21-25 Yrs: 4
26+ Yrs: 11
Preventive Medical Section

The Preventive Medical Section provides preventive health program services and education to the residents of Kenosha County. Individuals are seen in clinics, schools, homes, day cares, and workplaces, as well at the Division of Health on a walk-in basis through our Nurse of the Day clinic at three locations.
- Nurse of the Day Program
- Family and Reproductive Health Program
- Kenosha County Comprehensive Home Visitation Program

Nurse of the Day (NOD) Program

The NOD clinic provides a variety of services to clients on a walk-in basis at three locations: the Kenosha County Job Center, the Kenosha County Center, and the Kenosha County Wellness Center.

- 441 seasonal influenza doses administered (364 in 2017)
- 2,084 communicable disease reports received
- 7,000 urine drug screenings completed
- 3,105 immunizations administered (3,332 in 2017)
- 479 tuberculosis prevention and control clients served (521 in 2017)
- 4,054 urine alcohol screenings completed
- 7,000 urine drug screenings completed
- 479 tuberculosis prevention and control clients served (521 in 2017)
- 4,054 urine alcohol screenings completed
- 254 pregnancy tests administered
Family Planning and Reproductive Health Services provide Sexually Transmitted Disease (STD) screening and treatment, HIV testing and referral, annual exams for women with PAP testing as needed, contraceptive counseling and services, and sexual assault follow-up exams. Referrals for additional services such as mammograms are provided. High-risk persons are eligible to receive Hepatitis A and Hepatitis B vaccine. Partner Services (PS) are also available through the Family and Reproductive Health Team.

### Wisconsin Well Women Program (WWWP)

This state contract program provides breast and cervical cancer screening for eligible women. Annual exams for women include PAP testing as needed. Area providers deliver Mammography services. 292 clients were enrolled in 2018.
In 2015, KCCHVP expanded its programming to include a mom-baby health program that promotes long-term success for mothers with other children in the home. Nurses deliver support to moms and their babies providing professional support and knowledge of parenting skills. The relationship between mother and nurse strengthens the foundation for stronger families and healthier birth outcomes.

**Parents as Teachers Program**

In 2015, KCCHVP expanded its programming to include a mom-baby health program that promotes long-term success for mothers with other children in the home. Nurses deliver support to moms and their babies providing professional support and knowledge of parenting skills. The relationship between mother and nurse strengthens the foundation for strong families and healthier birth outcomes.

- **54 Active Clients**
- **853 Face-to-Face Visits**

**Nurse Family Partnership Program**

This mom-baby health program promotes long-term success for first time moms, their babies, and the community. Nurses deliver the support first-time moms need to have a healthy pregnancy, become knowledgeable and responsible parents, and provide their babies with the best possible start in life. The relationship between mother and nurse provides the foundation for strong families, and lives forever changed—for the better.

- **103 Active Clients**
- **1,399 Face-to-Face Visits**
Public Health Preparedness
Through a grant from the Centers for Disease Control and Prevention (CDC), the Division of Health is able to prepare the community for a natural catastrophic event or an emerging/re-emerging disease. Plans have been developed and exercised to ensure staff are able to respond and assist residents in an emergency. The community is educated to prepare their family, homes, and businesses prior to an emergency event.

Healthy People Kenosha County
Healthy People Kenosha County 2020 is a local initiative that partners public health with community representatives from government, public, private, and non-profit businesses and organizations for the purpose of developing a Community Health Improvement Plan (CHIP) for Kenosha County. The overarching goals of the CHIP are consistent with the national initiative Healthy People 2020, and the State of Wisconsin initiative Healthiest Wisconsin -- to increase quality and years of life and eliminate health disparities.

100 INDIVIDUALS ATTENDED THE INFANT HEALTH AND SAFETY FAIR
LAUNCHED THE “STRONG MOMS, STRONG VILLAGE” CAMPAIGN
Asthma Program
Kenosha County was selected as a pilot community for the State Asthma program to reduce the number of Emergency Department visits and hospitalizations. The program provides in-home education as well as an environmental review to reduce asthma triggers in the home. The program is currently in its fifth year.

School Nursing Program

Public health nurses provide services in the school setting to the individual and community for the prevention of disease and the promotion of health and well-being. The nurses develop health care plans for students with chronic medical conditions to accommodate the student in the school setting. They also provide staff training, disease surveillance, and health education to a total of 38 schools in the Kenosha Unified School District and Head Start Program.

- **15% Percent of Students with Prevalent and Potentially Life-Threatening Health Conditions**
- **5,483 Students Receiving “Family Life” Education (4,996 in 2016–2017)**

Medication Assisted Treatment (MAT) Program

KCDOH, in collaboration with the Division of Aging and Disability, and a local treatment/counseling service, is providing a program for opioid and alcohol dependent clients within Kenosha County. The goal of the program is to provide a comprehensive approach to addiction, assisting the client in maintaining abstinence and living a life of recovery. Prior to participating in the program, the client is assessed through medical and behavioral health screens. After screenings are reviewed, the client is scheduled to receive injectable Naltrexone (Vivitrol) every 28 days while engaging in intensive counseling sessions that provide support, resources, and guidance—all useful tools in a client’s road to recovery. This program has led to increased health outcomes for program participants and continues to offer an encouraging approach to address the addiction epidemic and unnecessary loss of life in Kenosha County.

Narcan Distribution Program

Narcan, nasal naloxone, is a life-saving medication that allows breathing to resume in an opioid overdose, thus preventing the overdose from becoming fatal.

- 129 Community and First Responder Trainings Held
- 1,114 Individuals Trained
- 1,098 Narcan Kits Distributed
- 2 Medication Disposal Events Held Collecting 2,574 pounds of medication

"Since I've been 15-16 years old I've been using or addicted to a substance, first starting out with alcohol and marijuana. I've always used something daily. Now that I've been clean, it feels so good to have my head clear. I can think clearly, and feel so happy and full of energy. I feel like I'm literally starting over at 20 years old again and re-doing my life."
Environmental Health Section

The program objective is the prevention of food-borne disease through regulation of restaurants, retail food establishments, school lunch programs, farmers markets, food dealers and special events. Activities include licensing, plan review, routine, follow-up and complaint inspections, consultations, and education.

- Environmental Health
- HUD Lead-Based Paint Hazard Reduction Project
- Laboratory

Food Protection

The program objective is the prevention of food-borne disease through regulation of restaurants, retail food establishments, school lunch programs, farmers markets, food dealers and special events. Activities include licensing, plan review, routine, follow-up and complaint inspections, consultations, and education.

- 851 active establishments licensed
- 1,047 inspections
- 465 consultations/plan review
- 116 consumer complaint investigations

Lodging Facilities

The program enforces regulations, which seek to ensure a safe, healthy and sanitary environment for residents and transients in hotels, motels, tourist rooming houses, bed and breakfast establishments, and mobile home parks.

- 62 establishments licensed
- 82 inspections
- 41 complaint investigations

Recreational Sanitation

The program goal is to ensure a safe and healthy environment for residents and visitors at recreational and educational camps, campgrounds, and public swimming pools through enforcement of State codes. Bacteriological testing of pool water is conducted in the KCDOH laboratory.

- 89 facilities licensed
- 85 inspections
- 23 complaint investigations
Rabies Control and Animal Nuisances

This program conducts investigations related to animal bite cases, determining rabies immunization status, and initiating animal quarantine and observation procedures as required by State Statute and local ordinances. In addition, this program handles the investigation of animal nuisances, such as animal waste and excessive number of animals per household, and the licensing and regulation of kennels and pet shops within the City of Kenosha.

![Graph showing Bite Investigations and Bite Consultations/Follow-ups]

Solid Waste Control

This program provides enforcement of City of Kenosha Charter #26 - Blighted Lot Ordinance. This includes the control of garbage, debris and rubbish; including investigation of citizen complaints and abatement of actual or potential rodent, insect, litter, blight or eyesore nuisances due to improper storage or disposal of waste.

- 1,627 Investigation of Citizen Complaints
- 923 Follow-up/Clean-ups

Environmental Health Hazards

- 5 Noise Complaint Investigations
- 27 Air Quality Investigations
- 38 Human Health Hazard Complaint Investigations
Transient Non-Community (TNC) Well Program

TNC water systems are public systems that serve at least 25 individuals per day and at least 60 days per year. The program involves annual bacteriological and nitrate sampling as well as sanitary survey well inspections to determine compliance with DNR well construction and pump installation requirements. There are a total of 180 TNC wells in Kenosha County.

**Sanitary Code and Private Sewage System Ordinance**

The principles of Chapter 15 is to regulate the proper sitting, design, installation, alteration, use management, and maintenance of all private sewage systems in Kenosha County. The purpose of this Chapter is to promote health, safety, prosperity, aesthetics, and general welfare to the residents of Kenosha County.

**HUD Lead-Based Paint Hazard Reduction Project**

The Division of Health was awarded a three-year, $3,300,000 grant from Housing and Urban Development (HUD) for a Lead-Based Paint Hazard Reduction Demonstration Grant in 2017. The grant award also includes funding to address healthy homes issues in 300 units. This program is being implemented in partnership with the Cities of Racine and Kenosha, and numerous other local community organizations. 2018 accomplishments include:

- Provided an appropriate level of lead hazard control services in identified housing units, and clearance testing for residential units.
- Provided technical support to companies and/or organizations to become a qualified lead abatement contractors that otherwise would not have this capacity.
- Provided educational outreach events with community partners to help advocate for the program, and work alongside other community programs.
- Provided a full continuum of services including blood samples, reporting, treatment and medical follow-up.
Laboratory

Each year, approximately 5,000 samples are submitted to the laboratory for testing and examination. The laboratory is certified by the United States Department of Health and Human Services to accept human specimens for the purpose of performing laboratory examinations. Approval has been granted in Microbiology, Diagnostic Immunology and Chemistry.

ENVIRONMENTAL BACTERIOLOGY UNIT

- Tests public and private water supplies for the presence of coliform bacteria
- Conducts chemical analyses of public and private water supplies for the presence of nitrates
- Conducts chemical analyses of public and private water supplies for the presence of fluoride
- Tests swimming pools and whirlpool water samples for coliform bacteria
- Tests swimming beaches for E.coli bacteria
- Tests samples from tattoo parlors for adequate sterilization of instruments
- Analyzes paint and pottery chips for the presence of lead
CLINICAL MICROBIOLOGY/SEROLOGY UNIT

- Performs diagnostic tests for Gonorrhea in support of statewide STD screening programs
- Performs serological tests for Syphilis
- Performs Preliminary testing on capillary and venous blood samples to determine lead levels in children ages 1 – 5

FORENSIC CHEMISTRY UNIT

- Analyzes blood specimens for the presence of alcohol
- Analyzes evidence submitted by local law enforcement for the presence of controlled substances
- Testifies in court regarding analytical findings
