ALL STOCK IS PERISHABLE, AND MUST BE PICKED-UP ON DELIVERY DAY, MID-APRIL (NOTICE WILL BE MAILED TO YOU)

ORDER EARLY - LIMITED SUPPLY - CHECKS WILL BE RETURNED IF YOUR ORDER CANNOT BE FILLED

FULL PAYMENT MUST BE INCLUDED WITH THE ORDER. NO REFUND/WARRANTY ON ALL PRODUCTS.

COMMON NAME	DESCRIPTION AND CHARACTERISTICS
AMERICAN ELDERBERRY GROWTH RATE – FAST	A shrub with large flattened clusters of tiny cream-colored flowers in summer, fragrant; large clusters of small dark purple berries in late summer. Full sun to partial shade; moist, well-drained soils are best, but will tolerate some dryness as well as wet sites; tolerates alkaline soil. Can grow up to 12' tall and 10' wide.
AMERICAN PLUM GROWTH RATE – MEDIUM	Medium to tall tree/shrub for farmstead windbreaks, highway and riparian plantings. Adapted to a wide variety of soil types. Fair to good drought tolerance. Full sun to partial shade. Bears white flowers in spring, and yellow to red edible fruit in June-July.
ALLEGHENY SERVICEBERRY GROWTH RATE – FAST	Plant the Allegheny Serviceberry in average or moist soil in full sun or partial shade. Adapts to dry conditions but performs best in moist, well-drained soil. Height: 15-30', mature spread: 10-15'. Fragrant spring flowers, easy to grow and widely adaptable, edible berries in summer and gorgeous fall color
BLACK CHERRY GROWTH RATE – FAST	The Black Cherry may grow to 60-80 feet tall by 30 feet wide (or larger) when it is found in an open field and live as long as 150 years. The fruit is a reddish-black cherry, which is edible although quite acidic. This species is found on a wide variety of soils. The black cherry is one of the largest cherries and, as such, its wood can be very valuable.
BLACK CHOKEBERRY GROWTH RATE – MEDIUM	Black chokeberry is a deciduous, cold-hardy shrub, showing white flowers in the spring and colorful red foliage and heavy, dark fruit in the fall. Tolerates partial shade but thrives in full sun. It is also an excellent choice for those tough, low-lying wet areas, yet it can acclimate itself to dry locations as well. It reaches 4–8 feet in height. Black chokeberry provides browse for white-tailed deer and rabbits, and fruits for ruffed grouse.
BLACK WALNUT GROWTH RATE – MEDIUM	One of the scarcest and most coveted native hardwoods, Black Walnut is used especially for furniture, gunstocks, and veneer. Individual trees fetch attractive prices. Fragrant leaves. Likes deep, rich, well-drained soil; grows more slowly in drier soils. Grows to 50' to 75', 60' spread. (May self-pollinate, plant two trees to ensure pollination) The delicious nuts must be gathered early, before squirrels and other wildlife can consume them.
BUTTON BUSH GROWTH RATE – FAST	A small bush that bears attractive summer foliage with creamy-white flowers appearing in late summer. Easily grown in moist, humusy soils in full sun to part shade. Grows very well in wet soils, including flood conditions and shallow standing water. Adapts to a wide range of soils except dry ones. Flower heads are very attractive to bees and butterflies.
COLORADO BLUE SPRUCE GROWTH RATE – MEDIUM	One of the most popular ornamental conifers, the Colorado blue spruce (or simply, blue spruce) is a truly magnificent sight. Grows best in full sun, in moist, well-drained, fertile soils. The Colorado blue spruce grows to a height of 50–75' and a spread of 10–20' at maturity. Needles are stiff, short, and silvery blue to greenish blue in color. Tree is Christmas tree shaped.
COMMON LILAC GROWTH RATE – MEDIUM	The Common lilac is noted for its showy, fragrant bloom in the late spring. Flowers come in many colors ranging from white, pink, blue, lavender to reddish-purple. Grows best in well drained, fertile soils, under full sunlight. Average height is 15'.
DAWN REDWOOD GROWTH RATE – FAST	Dawn redwoods are deciduous coniferous trees - that is the trees produce cones but lose their foliage in the fall. They enjoy full sun and moist, deep, well drained soil. They withstand flooding and are somewhat drought tolerant. A fast grower, Dawn Redwood reaches 70' - 100' in height with a 25' spread. Dawn redwood trunks are remarkably straight and the tree grows in a tall, slender,
EASTERN ARBORVITAE GROWTH RATE – MEDIUM	a.k.a. American arborvitae - Bright emerald green year-round foliage. Its dense foliage makes an excellent hedge or privacy screen. They will grow to a mature height of 30 to 40 feet and a mature spread of 10 to 15 feet. They prefer full sun to partial shade, and can grow in a variety of soil conditions. The Eastern Arborvitae is tolerant of heat, cold, and wet sites.
FRASER FIR GROWTH RATE - MEDIUM	Often referred to as the Cadillac of Christmas trees. Its fragrance, shape, strong limbs, and ability to retain its soft needles for a long time when cut (which do not prick easily when hanging ornaments) make it one of the best trees for this purpose. Full to partial sun. Likes cool, moist, well-drained soils.
HAZEL NUT GROWTH RATE- FAST	A large fast growing shrub with showy spring flowers. The Hazel Nut can grow to 8-12' tall with a crown spread of 10', creating a dense privacy screen, perfect for a hedgerow and as nesting sites for birds. The nuts of this American Hazel Nut have a higher nutritional value than acorns and beechnuts, making them a valuable food source for wildlife eaten by turkey, ruffed grouse, and
HYBRID POPLAR GROWTH RATE – EXTREMELY FAST	Grown from rooted cuttings this extremely fast grower is widely used in the fuel, pulp and fiber industry also makes an excellent windbreak. Hybrid Poplars can provide privacy and windscreens in 3 years, living borders and shade in 4 years and firewood in 5 years. Hybrid poplar trees grow up to 10 feet per year and they live 40+ years.
NORTHERN RED OAK GROWTH RATE – FAST	It is fast growing, easy to transplant, tolerant to a variety of soil conditions. Height: 50 to 75 feet. Spread: 50 to 75 feet. The abundant acorns attract wildlife, and the leaves develop a brick-red fall color. A variety of birds depend upon Red Oak acorns, the wild turkey in particular.
NORWAY SPRUCE GROWTH RATE – FAST	The Norway Spruce is the most widespread, fastest growing, largest and most disease resistant spruce in the northern hemisphere. This is not a tree for a small yard! The Norway Spruce can grow 2-3+ feet per year their first 25 years under good conditions. The Norway spruce has a fibrous deep spreading root system that makes this tree very wind stable, able to withstand winds up to
RED MAPLE GROWTH RATE – FAST	Brilliant fall coloring is one of the outstanding features of the Red Maple. This tree prefers full sun to partial shade and tolerates both extremely wet to extremely dry soils. The Red maple is prized as an ornamental shade tree because of its rapid growth, reaching heights of 40-70' tall. Leaves have a silvery underside and turn a pale yellow in the fall.
RED-OSIER DOGWOOD GROWTH RATE – FAST	Grows best in moist to wet soils with full sunlight. Average height is 8' and it spreads outward to 6'. Has bright red twigs with white flowers and white berries in the summer. Leaves turn dark red in the fall. The biggest selling point is the shrub's deep red stems that create a pop of color in the snowy, gray months. Fibrous root systems also provide effective erosion control on banks and slopes.
ROSELLOW SARGENT CRAB GROWTH RATE – MEDIUM	'Roselow' Sargent's Crabapple is a small dense-branching crabapple that is covered with pure white fragrant blossoms in mid-May. One of the smallest crabapples, it reaches a height of only 8 feet. Full sun is ideal. Resistant to drought, soil compaction and flooding. This tree does well on a variety of soils and is an excellent planting for wildlife or windbreak.
RUGOSA ROSE GROWTH RATE – FAST	The Rugosa Rose is a shrub mainly used as a hedge that has beautiful pink flowers that continually bloom from June through August and are 2 1/2 to 3 1/2 inches in size. It develops 1 inch red berries in August which last through the winter to provide food for wildlife. Grows to a height of 6' high and 6' wide.
SUGAR MAPLE GROWTH RATE – MEDIUM	The Sugar Maple is a landscape standout. Medium to dark-green leaves turn yellow, burnt orange or red in fall. Tolerates shade, likes a well-drained, moderately moist, fertile soil. Do not plant in confined areas or where salt is a problem. Grows to 60' to 75' with a 40'-50' spread. The sugar maple tree is the principal source of maple sugar.
WHITE PINE GROWTH RATE – FAST	The White Pine is a large, straight-stemmed tree with a pyramidal crown. Clustered soft blue-green needles. Ideal screen or windbreak. Likes moist, well-drained soils. Grows 50' to 80' with a 20-40' spread. Mature trees can easily be 200 to 250 years old.
WHITESPIRE BIRCH GROWTH RATE – FAST	Whitespire Birch has a nice narrow, pyramidal size and has chalky white bark that looks great all season long and because of its shape it's great along property lines. The bright green leaves rustle in the wind and turn the brightest yellow in the fall. It is heat tolerance and disease resistance. Grows well in full sun, reaching 50-60 feet when mature. It does well under a wide range of soil
